

INTRODUCING ELEVATE

A comprehensive suite to integrate fundraising operations and streamline the donor journey.

The donor journey can take many routes. And organizations asking for donations need to be able to accept funds through the channels that work best for donors. Integrating all the technology components required to make this possible can be daunting, but when they work together, they improve staff productivity and enhance the experience of your donors. On the other hand, anytime you introduce technology that isn't fully integrated, you introduce the risk of data, contacts, and opportunities slipping through the cracks.

Salesforce.org Elevate* has all the necessary building blocks to support a seamless donor journey. It is a fully integrated solution for fundraising, consisting of Giving Pages, which are easy to set up, as well as payment processing.

Salesforce.org Elevate is a suite of integrated products for the nonprofit and education sectors that gives organizations a new way to convert visitors into committed advocates. It provides a seamless management interface to engage donors and alumni while streamlining the critical back-end functions of payments, CRM, and accounting. Elevate delivers all the security and scalability you've come to expect from Salesforce while considering industry best practices and providing the support you need to grow your fundraising program.
